

Application

◆ Apply the product using a stainless steel trowel.

◆ Apply several coats until a perfectly even surface is achieved.

◆ During application, it is recommended to hold the product against the light to highlight any dips or imperfections.

◆ Once dry, sand with 120-grit sandpaper.

'U STÙCCU

Plaster-based smoothing paste stucco for high-quality finishes

Formulated with ultrafine - grained fillers and high quality **Sicilian gypsum crystals**, it ensures excellent filling capacity, a high level of whiteness, and exceptional ease of sanding.

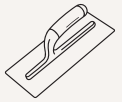

It does not tear during application and **guarantees extreme smoothness**.

Suitable for use on gypsum based or cement-based plasters, it allows for filling **up to 8 mm in different layers**.
